

ADMINISTERING MEDICATIONS TO STUDENTS

It is the policy of the Evansville Community School District that medication should be administered to school children by parents/guardians at home whenever possible. However, when requested by parents/guardians, medications prescribed by a health care practitioner and nonprescription medications may be administered by school staff under the following established conditions.

School personnel must receive a written parental/guardian consent and written instructions from the students' health care practitioner before any prescription medication can be administered to a student. A form is available from the District website and school offices for this purpose. A form from a clinic is allowable if it has all of the information on the District form.

Non-prescription medications may be administered with written parental/guardian consent only unless the dosage requested is greater than the recommended dose for the student's age/size in which case written consent is required from the health care practitioner.

Any student possessing prescription or non-prescription medication without following the procedures set forth in this policy may be subject to disciplinary action. Sharing/dispersing of prescription or non-prescription medications may result in immediate suspension. Sale of medications will result in a recommendation for expulsion.

All written instructions and consent forms will be filed in the school office. The school nurse shall be responsible for reviewing the written medication instructions. The building principal and his/her designees will be responsible for maintaining complete and accurate medication records, and storing all prescription and non-prescription medications in a safe and secure place. School personnel authorized to administer medications to students will be provided appropriate instruction and training by the school nurse.

The following procedures shall be adhered to when administering medication to students in grades PreK-12.

Procedures for Administering Medication to Students:

1. Definitions:

- Administer – Medications which are in the possession of the school and given to the student by designated school personnel.
- Health Care Practitioner (HCP) – Any physician, dentist, optometrist, physician assistant, advanced practice nurse prescriber or podiatrist.
- Medication – Medication includes any drug or remedy for illness. Prescription, non-prescription (Over the Counter – OTC), and herbal treatments are all considered medication.
- Medication Error – Medication errors include: administering the wrong medication or doses of medication, administering the medication at the wrong time, administering a medication by the wrong methods or route (i.e. orally instead of injection) or failing to administer the medication.

- Pupil – Any person who is enrolled in the Evansville Community School District as a student, on a full or part-time basis in an approved instructional or co-curricular activity.
- School – A pupil is in school when in attendance at an approved instructional or co-curricular activity, whether held on or off school premises.

2. Prescription Medications

- Prescription medications will not be administered to a student until the following steps are completed:
 1. The parent/guardian provides the school with a completed parent/guardian consent form.
 2. The school receives a completed physician order form for administering medications.
 3. Designated staff have been trained to administer medications.
- Prescription medications must be in the original container from the pharmacy. Information printed on the container must include:
 - Student's full name
 - Name of medication and dosage
 - Time medication is to be administered
 - HCP name
- Prescription medication will be stored according to manufacturer's guidelines. Prescription medications will be kept in a secured cabinet or drawer that is not accessible to students or where food is stored. Only a limited quantity of the prescription medication is to be kept at school.
- Only District employees who are designated by the principal of each school will be able to administer prescription medications. Except in an emergency, the only other people who may administer prescription medications to a student include:
 - Student's parent/guardian
 - School nurse
 - Emergency response worker
- The length of time for which a prescription medication is to be administered will be specified in the written instructions from the prescribing HCP. The maximum length of any written instruction will be until the end of the current school year. Any time there is a change in dosage, number of doses, or time of administration a new written statement from the prescribing HCP is necessary.
- School personnel will communicate with parents/guardians when the supply of medication at school needs to be refilled. The current medication container will not be sent home for the parent/guardian to refill.
- With medications that are to be given at a specific time during the day, there is a leeway of 60 minutes before to 60 minutes after this specific time within which the medication can be given.
- The District will have the school nurse review and consult with the building principal and school district medical advisor if necessary, all requests for the administration/dispensing of injectable medications by school personnel in order to maintain the physical, emotional, and mental health of pupils and staff members while they are at school or at school sponsored activities. If it is determined acceptable, the school nurse will train and supervise the administration/dispensing of the medication by the school personnel. This policy does not preclude students who self-administer prescription medications from continuing this practice.

- i. The following non-emergency situations should be reported to the school nurse who will follow-up with parents/guardians and/or HCP:
 - The color or shape of a refill medication is different from the last prescription.
 - Information on the medication permission form from the practitioner is different from the information on the label of the medication container.
 - A parent/guardian gives permission for school personnel to give a medication at a time other than the scheduled time. Do not give the medication; this situation requires a change by the HCP on the medication consent form.
 - Parent/guardian calls the school or sends a permission slip to school requesting the dose of medication be changed. Do not give the medication; this situation requires a change by the HCP on the medication consent form.
 - The label on the front of the medication container requires a tablet to be cut. Do not give the medication. The District is not responsible for the cutting or breaking of pills. If pills are already split, they may be administered.
- j. It is the responsibility of the school to insure that prescription and non-prescription medications, which are administered by school personnel, be provided to the correct student, at the designated time. The only exceptions would be if the student refuses the medication, or is absent from school. A student's refusal to take medication should be documented and the parent/guardian informed. Notification of parent/guardian will also be documented. It is also the responsibility of the school employee administering medications to witness the student taking the medication in his/her presence.
- k. When a school staff person identifies that medication the school is administering is missing, the building principal and school nurse will be notified. The school staff person will document on the medication log the date, time, amount, and medication name that is missing. The principal, or designee, will contact the student's parent/guardian to inform them of the missing medications. If the medication is a controlled substance (i.e. Ritalin, Adderall, Methylphenidate, etc.), a report must be filed with the Director of Pupil Services and the Evansville Police Department.
- l. When a medication error is noted by school staff, it must be documented with the school building principal and school nurse. Appropriate medical contacts will be consulted and such contacts documented.

3. Non-Prescription Medications and Herbal Treatments

Designated personnel will administer non-prescription (over-the-counter) medication and herbal treatments only with parental approval as indicated by written consent on the Medication Consent Form. Non-prescription or herbal treatments must be in an original container and labeled with the child's name, why the medication is needed, when to use the medication/treatment and amount of medication/treatment to give.

If the dosage for non-prescription medications or herbal treatments is higher than the recommended dose for the student's age/size, written consent is required from the HCP.

4. Adverse Side Effects

Any school staff person who observes adverse side effects to a medication or has concerns with behavioral or physical changes of a student should report these concerns to the parent/guardian and building principal and appropriate medical contact made if necessary. If a student is exhibiting side effects to a medication, the nurse will be contacted to follow-up on the concerns. If

a change in medication is made by the doctor, verbal orders can be taken by the nurse and followed up with written orders to both the doctor and parent/guardian. If the parent/guardian requests changes in the medication, the only change the school can make is to stop administering the medication. If this is the case, school staff will provide the parents/guardians with a new medication consent form to be completed by the HCP.

5. Self-Medication of Non-Prescription Medications for High School Students

High school students may self-administer non-prescription medication in the school with prior permission (Medication Consent Form 453.4 Form). Current state law allows a student to carry an inhaler if the school receives a written request from the parent/guardian and doctor. Parents/guardians will be notified if the privilege to carry an inhaler and/or self-medicate is suspended or removed.

6. Disposing of Medication

Before the end of the school year, the District health clerk will send a letter home to parents/guardians indicating they are responsible for coming and picking up remaining medications at school. Medications, with the exception of inhalers, will not be sent home with students. Medications that are not picked up by parents/guardians will be collected by designated staff. Each medication (both prescription and non-prescription) will be listed on a manifest along with the student's name. For prescription medications, the number of pills will also be added to the manifest. A manifest will be completed for each school. Two persons must sign off on the completed manifest. Prescriptions and nonprescription medications will be collected and disposed of in the Drug Drop-Off Box at the Evansville Police Station.

The Emergency Nursing Manual (Appendix A) will provide direction and more detailed process information. School personnel should under no circumstances provide aspirin or any other medicine to students without meeting stated criteria. An accurate and confidential system of record keeping shall be established for each student receiving medication.
