Review Software Data

The committee reviewed the data collected from the remaining buildings, LLE, TRIS, and EHS. There were a good number of responses from each building and there is still room to collect more data from other departments or grade levels. This additional information will be included in follow up survey that will be sent out during the January Professional Learning day. After the follow up survey, data will be cleaned, then combined into a single source.

Update CSI Action Plan

The committee revised portions of the action plan and will continue to add to it at the next meeting.
