

Developmental Screener Event

The Evansville Community School District is inviting children, who are 3-6 years of age to be screened. Your child will be encouraged to play and engage in activities during which social, communication, motor, and early learning skills will be observed. School personnel familiar with child development will be available to share their observations and discuss any questions or concerns you may have.

A representative from Birth to three will be available if you have a child under the age of three to answer any questions about your child's development.

Research has shown that early intervention for children with disabilities can make their later school experiences more successful. The Evansville Community School District has special education preschool programs available for children 3, 4 and 5 years of age who have been identified as having special needs. State and Federal laws require school districts to actively locate and screen preschool-age children and to offer services to those children who qualify.

This screening will take place on Monday, February 19 from 9:00-11:00 AM and 1:00-6:00 PM at Levi Leonard Elementary, 401 S Third St., Evansville, WI 53536

If you wish to schedule an appointment for your child, please call Jennifer Hansen at 608-882-3384 or email at hansenj@evansville.k12.wi.us by Friday, February 16.

This screener is not mandatory but is recommended if you have concerns about the early childhood development of your child or you would like to learn more about your child's development.
