Review Software Data

The committee reviewed the data including the additional information received after the second survey was sent out. A number of duplicates are still present after e.g. Microsoft Word is included in Microsoft Office. A visual will be created to update the Board, and build off of in the future. Additional discussion was had regarding the holes, or missing pieces, in the data and how to move forward. Look at collecting data during a structured time such as the next staff development days.

Update CSI Action Plan

The committee reviewed the action plan and what information can be presented to support the plan.
