

EDUCATION FOR EMPLOYMENT

It is the intention of the Evansville Board of Education to provide an opportunity for students to develop skills, attitudes and knowledge needed for success in employment, to build foundations for further education and to acquire lifetime skills.

Curricula and learning experience shall be provided to assure every student an opportunity to explore potential careers and, when appropriate, acquire the occupational skills necessary for the transition from school to performing meaningful work in a chosen occupation field.

To reinforce employability skills, the school board encourages businesses, private individuals and the schools to work jointly through partnerships or school-supervised work experience programs which promote effectiveness in seeking, obtaining and retaining employment.
